

AdvancedMC Ruggedized Mid-size Carrier

For Standard AdvancedMC Modules or Modules with additional screw fastener. According to PICMG® MicroTCA.1 (Rugged Air-Cooled) Specification

- Locking Feature without exerting pressure to the bottom of the AdvancedMC Carrier Connector
- Up to Three Rugged Single, Mid-size AdvancedMC Modules
- For Installation in AdvancedTCA Chassis
- IEA-R Carrier Insertion / Extractor handle with Microswitch
- Integrated spring mechanism maintains a defined open position of the handles which facilitates insertion of the AMC Carrier into the chassis
- Die-cast endpieces additionally stabilize the Front Panel and provide strength. An integrated guide pin guarantees a defined positioning of the Carrier Board assembly in the system
- Additional configurations are possible based on your requirements

- Problem-free mounting in an AdvancedTCA Chassis. Ease of Insertion and Extraction into the System.
- Up to Three Rugged Single, Mid-size AdvancedMC Modules Allowable
- IEA-R Insertion / Extractor Handle provides enhanced Strength, Ergonomics and High Reliability
- Die-cast endpiece for increased Stability and ruggedness
